

Al's Hugelkultur

1. Fir logs that were on the ground for a few years were used for the outside. Rotting/rotten alder and fir logs placed inside on the existing sod.
2. Real rotten logs broken up and pieces spread over the logs on the ground, filling in the spaces between them.
3. Layer of rabbit manure and alfalfa hay from friends rabbit operation spread on top of logs. Dirt from old stump pile and compost spread on top.
